Diametro della filettatura della spina di rotazione dell' aratro (M): questa misura determina il tipo di avantreno (D) dell'aratro, compreso il relativo collegamento con il telaio principale.

Thread diameter of the plough axle (M): this measure determines the type of forecarriage (D) of the plough, including its connection with the main frame.

Distanza tra tra le punte dei corpi lavoranti: questa misura determina i componenti di struttura del telaio (trave principale, piastre del telaio, tiranti e componenti dedicati).

Distance between the tips of the working bodies: this measure determines the components of the frame structure (main beam, frame plates, rods and components dedicated).

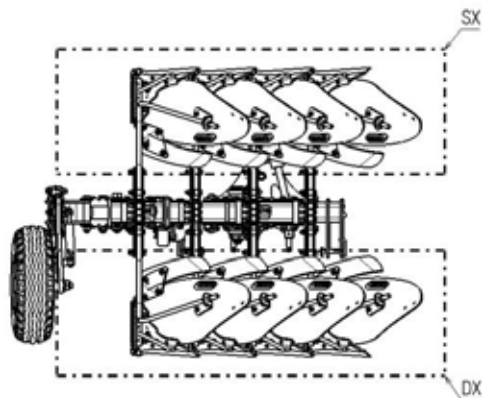

Altezza del telaio dal suolo: questa misura determina l'altezza della "bure" presente sull' aratro.

N.B. l'altezza va rilevata ad aratro in posizione orizzontale a riposo (scollegato dal trattore)

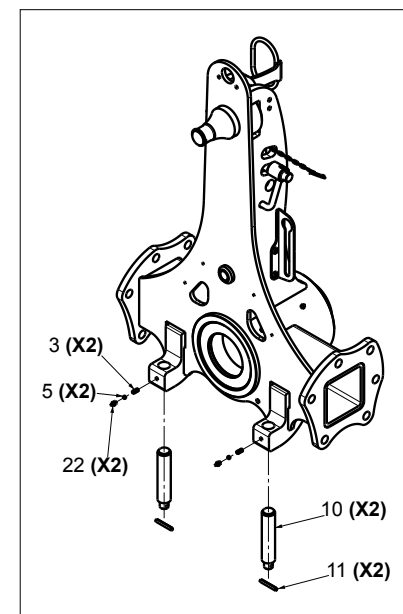

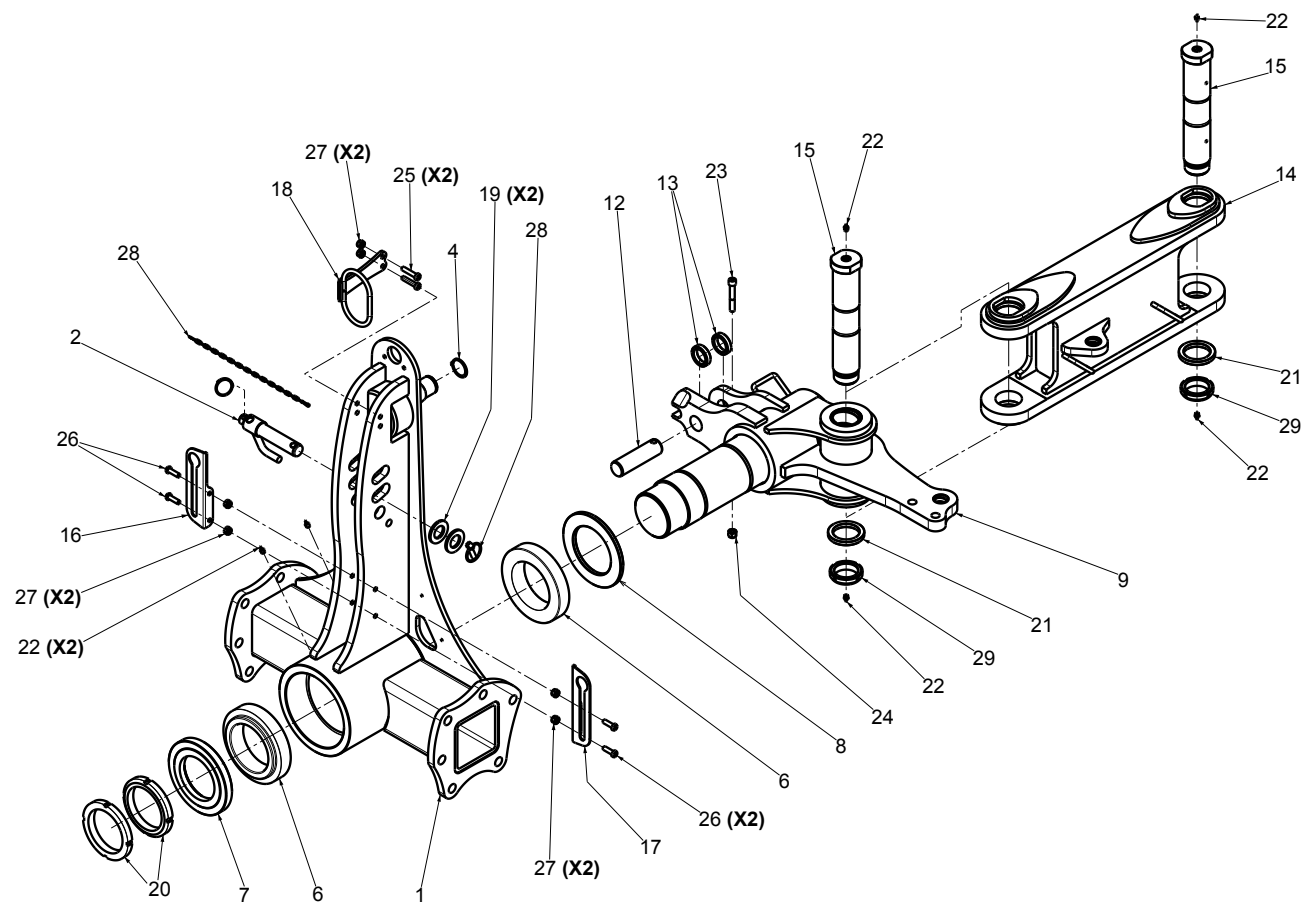

Frame height from the ground: this measure determines the height of the "leg" mounted on the plough.

N.B. the height should be measured with the plough leaning on the ground and detached from the tractor.

Identificazione lato Sinistro (SX) e lato Destro (DX) guardando da dietro l'aratro.
